🛠️ Support & Troubleshooting

📂 1. Account & Login Issues

- **Why can't I log in after registering (Only RO level)?**
  - **Approval Pending:** Your account is inactive until verified by your **Divisional Forest Officer (DFO)**.
  - **Solution:** Contact your DFO to approve your request in their *User Management* dashboard.
- **I forgot my password. How do I get back in?**
  - Contact your DFO or National Helpdesk to reset the password.

📂 2. Photo & Document Uploads

- **Why is my photo being rejected?**
  - **Missing Coordinates:** The MIS requires **Geo-Tagged** photos. Verify that your phone's GPS was **ON** when the photo was taken.
  - **File Size:** Images must be **at least 50KB**.
  - **Wrong Format:** Ensure your file ends in **.jpg, .jpeg, or .png**.
- **The "Save" button isn't doing anything.**
  - **Red Highlights:** Scroll up to find any fields highlighted in red. All fields with an asterisk ($*$) must be completed.
  - **Session Timeout:** If you have been on the page a long time, the **Captcha** may have expired. Refresh the Captcha and try again.

📂 3. Workflow & Data Visibility

- **I can't see my Seed Collection data in the Processing Module.**
  - **Destination Error:** Check if the seeds were correctly marked as **"Sent To"** your specific Processing Unit during the collection phase.
  - **Approval Status:** Data only moves to the next module *after* it has been **Approved** in the previous stage.
- **I accidentally approved the wrong information.**
  - Once **Approved**, a record is locked to maintain the **Chain of Custody**.
  - **Action:** You cannot edit or delete this yourself. You must contact the **National Helpdesk** to request a backend correction.

📂 4. KML & Mapping Errors

- **The KML file won't upload.**
  - Ensure the file size is **under 5MB**.
  - The file must be a true **.kml** format (not .kmz or .txt). Use Google Earth or a mobile GPS app to re-export the file if it is corrupted.
